- Ensure Personal Information about an Individual is used by the Church for the purpose for which it was collected or a related purpose (directly related to sensitive information) that the individual would reasonably expect.
- In the case of a large organization such as the Church, just because an individual provides Personal Information for one purpose (ie. - Prohibit the transfer of information via unsecured mobile devices (ie. USBs, etc.);

#### **ACCESS**

- Access to general and private Personal Information must be controlled with appropriate access processes and limited to the least amount of Church personnel necessary;
- Security codes and keys to Church facilities must be reviewed every six (6) months and security codes and passwords should expire and be renewed periodically.
- If an Individual whose Personal Information is stored in the Church's facilities wants access to the information, they must request access from the privacy officer.

#### **RETAIN/DELETE**

- Anything not required for Church records should be securely destroyed on all access points (email, cloud, locally) at the earliest possible opportunity. This may be the end of the day, week or month.
- If the information relates to taxation purposes it should be kept for seven (7) years.
- Any Information gathered should be securely destroyed after seven (7) years.

**In certain circumstances, individuals may provide Personal Information where there is no reasonable expectation of privacy (ie. sign-up sheets, etc.). In these circumstances, the procedures regarding access, storage and retention/deletion may not apply.**

## Checklist for Electronic Security

- Promptly remove network access rights upon Church personnel departure, as well as periodic
